## Personal Profile

---

As a former fashion designer, I bring a unique blend of creativity and precision to my career transition into software development. My background has honed my logical thinking, attention to detail, and problem-solving skills—qualities essential in IT. I am drawn to the tech field because it offers endless opportunities for growth, challenges, and innovative problem-solving, which I thrive on. My passion for tackling complex tasks and finding efficient solutions drives me to excel in coding and software development, where I can merge my creativity with analytical rigor.

I am currently engaged in a 12-week intensive Digital Skills Bootcamp in Software Development with **Just IT** training. I am looking to build on my skills and develop new skills to develop a career as a developer. I have completed several projects using HTML, Python, and JavaScript which have been posted in my GitHub portfolio. My immediate goal is to become established in a role as a Software Developer or apprentice and work with like-minded individuals from whom I can learn as much as possible during my crucial years of development.
